

Thank you for participating in our child screening and monitoring program. The Ages & Stages Questionnaires, Third Edition (ASQ-3), is a screening tool that will provide a quick check of your child's development. The information you provide will be helpful in determining if there are community resources or services that may be useful for your child or your family.

**Section 1.** The first section of the ASQ-3 looks at five developmental areas. Each area has six questions that go from easier to more difficult. Your child may be able to do some, but not all of the items. Read each question and mark:

- **Yes** your child is performing the skill
- **Sometimes** your child is performing the skill, or
- **Not yet**, which tells us your child is not yet performing the skill.

Following is a brief description of the five developmental areas:

- **Communication:** Looks at language skills, both what he or she understands and what he or she can say
- **Gross motor:** Looks at large muscles, how your child uses his or her arms and legs, and movements and coordination
- **Fine motor:** Looks at your child's hand and finger movement and coordination
- **Problem solving:** Looks at how your child plays with toys and solves problems
- **Personal-social:** Looks at your child's self-help skills and interactions with others

**Section 2.** The Overall section asks important questions about your child's development and any concerns you may have about your child's development. Answer questions **yes** or **no**, and if indicated, please explain your response.

You will need to gather some household items to complete the ASQ online. Paper, pencil or crayons, small scissors, a ball, a simple puzzle, and blocks (or other stackable objects).

Have fun completing this questionnaire with your child, and make sure he or she is rested, fed, and ready to play before you try the activities!

If you have any questions or concerns, please contact
